

# Metalius Welding Trestle

Welding trestle Metalius 1000mm ; this new addition to our range is the ideal accessory for your Metalius welding tables. An ideal solution for supporting larger workpieces, they allow for precise and straightforward assembly of larger constructions. The trestle top is made from S355J2+N steel.

- Ergonomic and modular design
- Reinforced S355J2+N steel worktop
- Available in both 16mm and 28mm
- Robust steel construction
- Optional adjustable swivel casters with brakes

Our welding tables have a stable, durable surface for precise welding. They can withstand heat, weight, and pressure. With their adjustable height, clamping holes and perfectly flat surfaces, they improve accuracy and workflow.
